

Tomato – page 1

Cherry. Round or grape-shaped small tomatoes typically 1/2 to 2 ounces

Slicer. Round or oblate shaped tomatoes with slicing texture, typically 3 to 8 ounces.

Beefsteak. Oblate shaped slicing tomatoes typically 8 oz and larger

Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Category	Form	Variety	Description	Days to Maturity
Cherry	Indeterminate	5 Star Grape	a highly rated, indeterminate F1 hybrid known for producing abundant, sweet, and crack-resistant red fruit in about 62 days. These meaty, small, grape-shaped tomatoes are low in juice and seeds, making them excellent for snacking, salads, and roasting.	62
beefsteak	Indeterminate	Amana Orange	1 lb beefsteak, glowing orange color and meaty flavor	80
Paste	Indeterminate	Amish Paste	Blocky, Roma-type perfect for paste and canning	85
beefsteak	Indeterminate	Beefsteak	1- 2 lbs with deep red flesh and a meaty texture and a full, rich flavor.	80
beefsteak	Determinate	Beefy Purple	Beefy Purple is a determinate, mahogany-purple tomato variety known for its large (12-14 oz), meaty, and flavorful fruits, which feature green stripes and a balanced, slightly smoky taste.	70
beefsteak	Indeterminate	Better Boy Plus	Better Boy Plus is an improved, indeterminate F1 hybrid tomato, offering higher disease resistance and sweeter, 6.5–8.5 oz bright red fruit compared to the original Better Boy.	80
beefsteak	Indeterminate	Big Beef Beefseak	Red, globe shaped 10-12 oz fruit with heavy yields.	75
beefsteak	Indeterminate	Big Boy Hybrid	a highly productive, indeterminate beefsteak tomato, famous for producing massive, 1 lb. scarlet-red fruits with a classic, rich flavor.	80
beefsteak	Indeterminate	Big Orange	Known for being 1 lb, round, and having skin that peels easily, offering a very sweet flavor.	80

Determinate forms stop shoot production once flowers form on the ends.
Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.

Dwarf: A dwarf tomato plant is a tomato plant with dwarfism. It can be either determinate or indeterminate, but most are indeterminate, which is why they are so prolific for their size. Typical size is 1.5' to 4.5', and require staking. Can be grown in 5 gallon containers and should not be sucker pruned.

Limited quantities of all plants, so inclusion on this list is no guarantee of availability

Category	Form	Variety	Description	Days to Maturity
slicer	Indeterminate	Black Truffle	Black Trifele (or Black Truffle) tomato is a highly regarded heirloom variety, originating from Russia. Known for its pear-shaped, deep burgundy-to-purple fruits with green shoulders, it offers a rich, complex, and slightly sweet flavor. It is a popular, meaty, and reliable potato-leaf indeterminate variety, yielding 6-8 oz tomatoes.	70-80
slicer	Determinate	Bradley	The Bradley tomato is a popular, reliable heirloom slicing tomato released by the University of Arkansas in 1961. It is a semi-determinate (or determinate), compact, and bushy plant, typically yielding 7-12 oz pink, smooth-skinned fruits with a soft, sweet, and mild flavor. Ideal for humid climates, they are highly regarded for canning, freezing, and fresh use.	75-80
cherry	Indeterminate	Brad's Atomic Grape	Large elongated cherry tomato developed by Brad Gates of Wild Boar Farms. Known for its stunning, multi-colored striped appearance (lavender, purple, green, red, and brown), it offers a sweet, rich flavor with a firm texture. These tomatoes are crack-resistant, hold well on the wispy vines, and thrive in warm climates. The fruit turns from lavender/purple to a complex mix of olive-green, red, and blue/brown when ready to harvest.	75
beefsteak	Indeterminate	Pink Brandywine	A renowned heirloom beefsteak tomato, celebrated for its large (14-16 oz), deep pink fruit and rich, sweet, "old-fashioned" flavor. These indeterminate, potato-leaved plants take 75-90 days to mature and are best suited for staking or caging, producing a late-season harvest.	90
slicer	Indeterminate	Brandywine, Red	A potato leaf plant that produces a large sized fruit with a sweet, rich, "spicy" flavor. The beefsteak shapes is pink to deep red, perfect sandwich tomato.	85
slicer	Indeterminate	Brandywine tomato	An Amish heirloom that dates back to 1885 and is generally considered to be the world's best-flavored tomato. Plants look like potato vines with good yields of extra-large (weighing up to 1-1/2 lbs.), firm, clear-skinned, light rosy-pink fruits.	90
slicer	Determinate	Bush Early Girl	4" across tasty red fruits are larger than Early Girl and ripen just 2 days later. 18" plants. Multiple disease resistances. Perfect for containers. Bush Early Girl bears a surprising number of delicious tomatoes in a small garden or a pot.	60

Determinate forms stop shoot production once flowers form on the ends.
Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.

Dwarf: A dwarf tomato plant is a tomato plant with dwarfism. It can be either determinate or indeterminate, but most are indeterminate, which is why they are so prolific for their size. Slicer. Round or oblate shaped tomatoes with slicing texture, typically 3 to 8 ounces.

Beefsteak. Oblate shaped slicing tomatoes typically 8 oz and larger

Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Category	Form	Variety	Description	Days to Maturity
slicer	Determinate	Celebrity	The Celebrity tomato cultivar is a hybrid that produces long fruit-bearing stems holding 20 or more very plump, robust tomatoes. Fruits weigh approximately 8 oz., and are 4 inches across.	70
beefsteak	Indeterminate	Chef Choice Orange	5 to 6 inch beefsteak-type fruits have flattened globe shape, averaging 9 to 12 ounces each, with bright orange, almost neon color both inside and out that doesn't fade or discolor when cooked.	75
beefsteak	Indeterminate	Cherokee Purple	Dusky, purple pink color heirloom is a favorite among gardeners for its old-fashioned taste	80
Cherry	Indeterminate	Cherry Baby	Sweet, tangy 1 oz fruits in long clusters.	70
cherry	Indeterminate	Chocolate pear tomatoes	Nearly black pear-shaped tomatoes producing over a very long season. Chocolate Pear has the rich tomato flavor that has made heirlooms so popular! Light red in color, overlaid with swirls of varying hues of green or brown.	70
slicer	Indeterminate	Costuluto Fiorentino	This tomato's ribbed/scalloped appearance and rich flavor make it a favorite among gardeners and chefs alike, especially those looking for authentic Italian heirloom varieties. This variety is known for its excellent, robust, old-fashioned tomato flavor. It has a good balance between sweetness and acidity, making it ideal for sauces, salads, and other culinary uses.	80
cherry	Dwarf	Dwarf Eagle Smiley	Extremely productive, Spokane MG taste testing winner! Rugose, regular leaf plants grow to 5 foot. Bright to golden-yellow, 1 oz, globe-shaped fruit in clusters of 8 to 10 tomatoes	60
slicer	Indeterminate	Early Girl	57 days One of first to ripen and Spokane favorite. Keeps producing until frost. Full robust flavor. 1-1.5 inch tomatoes.	57

Determinate forms stop shoot production once flowers form on the ends.

Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.

Dwarf: A dwarf tomato plant is a tomato plant with dwarfism. It can be either determinate or indeterminate, but most are indeterminate, which is why they are so prolific for their size. Slicer. Round or oblate shaped tomatoes with slicing texture, typically 3 to 8 ounces.

Beefsteak. Oblate shaped slicing tomatoes typically 8 oz and larger

Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Category	Form	Variety	Description	Days to Maturity
slicer	Indeterminate	Early Girl Plus	An improved, indeterminate hybrid tomato variety that matures in 60-75 days, offering the same classic, sweet flavor as the original Early Girl but with superior disease resistance, including Verticillium Wilt and Tomato Spotted Wilt Virus (TSWV). These 4-6 oz red slicers are high-yielding, prolific producers, ideal for salads and sandwiches	60-75
slicer	Determinate	Early Wonder	This early maturing plant produces high yields of 6 oz dark pink tomatoes. It has a rich old fashioned tomato flavor. Perfect for sandwiches, salads, and slicing. Suitable for container gardening. An excellent choice for home gardens. An heirloom was developed by Burgess Seed in 1950.	55-70
slicer	Determinate	Fantastic F1	High-yielding, 2014 All-America Selections winning grape tomato known for its blight tolerance, sweet flavor (8-10% Brix), and early 60-day maturity.	60
slicer	Indeterminate	Fourth of July	One of the earliest varieties of non-cherry tomatoes. Red in color, globe-shaped, weight between 2 and 3 ounces. Described as possessing a better than average taste. Main attractions are its earliness, disease resistance and the volume of fruit.	55
cherry	Indeterminate	Gardeners Delight	This old German heirloom boasts many clusters of 6 to 12 cherry tomatoes all summer long. It's indeterminate, crack resistant and very prolific. Proven tops for performance, flavor and wide adaptability.	70
beefsteak	Indeterminate	German Johnson	A popular heirloom, indeterminate beefsteak tomato known for producing large, pink, meaty fruits that often weigh over one pound.	80
slicer	Indeterminate	Jetsetter	Big, juicy, smooth, uniform, flattened globes with a nicely balanced, sweet, rich taste that mimics that old-fashioned real-tomato flavor. Strong disease package makes it ideal for home gardeners and market growers. Spokane MG taste test winner!	65

Determinate forms stop shoot production once flowers form on the ends.

Category	Form	Variety	Description	Days to Maturity
slicer	Indeterminate	Oregon Spring	60 days Early, 3-5 oz. red fruit. Cold tolerant. Nearly seedless. Good for ketchup and sauces. Heirloom slicer	60
slicer	Indeterminate	Paul Robeson	An old fashioned Russian heirloom that has a very tasty flesh that is juicy with a great acid and sweet balance. This deep maroon colored variety is slightly flattened and round and grows up to 4." The Paul Robeson Tomato is an excellent choice for cooler growing regions.	90
beefsteak	Indeterminate	Pineapple Slice	Sweet taste, yellow with red marbling	80
slicer	Indeterminate	Pink Brandywine	Pink Brandywine tomatoes are known for their delicious sweet flavor, smooth flesh and hefty size of around 1 lb. each. Interestingly, these large, well-known heirloom tomatoes that date back to the late 1800s grow on vines that are potato-leaved.	90
beefsteak	Indeterminate	Pomodoro Red Pear	An old Northern Italy variety. It produces 8-18 oz Beefsteak type tomatoes. This variety is pear shaped, red skin, deep red flesh with heavy ribbing. It's a very heavy producer of excellent tasting dense tomatoes.	70
slicer	Indeterminate	Porters Pride	A high-yielding, heirloom, indeterminate tomato developed by Texas-based Porter & Son Seed Co. for hot, dry climates. It produces 3-4 oz, red-pink, meaty, and flavorful fruits in clusters of 5. It is highly regarded for canning, salads, and juicing due to its firm texture and disease resistance	75-80
cherry	Semi-determinate	Prairie Fire	Scarlet with gold flecks, elongated fruit has sweet fruit with a brix reading of 10.0	75
beefsteak	Indeterminate	Rebekah Allen	This pink slicer boasts positively superb flavor. The flavor is perfect—an ideal balance of sweet to tart, with complex "old fashioned" undertones. Heavy yielder of large pink fruit on vines that appeared to have some disease resistance.	75-80
slicer	Indeterminate	Red Brandywine	The very vigorous plants bear large-lobed, beefsteak-shaped fruit that are perfect for slicing. The thin-skinned, pinkish-red tomatoes are flavorful but not acidic.	80

Category	Form	Variety	Description	Days to Maturity
cherry	Indeterminate	Red Torch	Striped oblong fruits that are 1 ½ inch long and weigh about 1 ½ ounces, with excellent flavor and great texture. All-America Selections (AAS) Winner 2019	70
Paste	Indeterminate	Redorta	A much larger tomato (8 oz., 4-inch) with much better taste than its cousin, San Marzano. Meaty, delicious enough to eat off the vine with the bonus of ending up with more tomato paste per plant. An excellent choice for a wonderful complex and flavorful choice for tomato sauce , canning or salsa. Disease resistant.	78
paste	Determinate	Roma	Traditional plum, large yields of pear-shape red fruit. 2 oz, 3" long. Meaty with few seeds and a bit of juice. Good for sauce or fresh. Stake or cage because heavy producer. Good disease resistance.	85-90
slicer	Determinate	Rutgers 250 OG	Rutgers 250 is a celebrated heirloom variety that pays tribute to Rutgers University's 250th anniversary, building on the legacy of the original Rutgers tomato first released in 1934. These determinate plants produce smooth, thick-skinned red fruits averaging 6–7.5 oz. with a classic globe shape and slight flattening. Known for its crack resistance and balanced flavor of sugar and acidity, Rutgers 250 offers improved taste and texture over the original while maintaining the Jersey tomato tradition. A true favorite among home gardeners, it remains one of the most popular tomatoes in the United States.	85
cherry	Indeterminate	Rosita's Brandywine	Large round pink cherry tomato packed with the flavor of the famous Brandywine. Short determinate plants that are easy to grow and loaded with deliciously sweet and juicy bite-sized fruit.	60
paste	Determinate	San Marzano	Reliable paste tomato with excellent taste.	80
slicer	Determinate	Sandpoint	The smallest and earliest of our Idaho bred varieties...great for containers! Extremely early variety bred by the U of Idaho in the 1960s. Small fruits range from cherries to saladette size, on very compact plants--excellent for containers, and for short season areas.	65
