

Tomato - page 1

Category	Form	Variety	Description	Days to Maturity
beefsteak	Indeterminate	Amana Orange	80 days 1 lb beefsteak, glowing orange color and meaty flavor	80
paste	Indeterminate	Amish Paste	Versatile heirloom, used in sauces, canning or eaten fresh. 6-8 oz teardrop. Heirloom paste	85
cherry	Dwarf	Bendigo Dawn, Dwarf	Rugose, regular leaf plants produce high yields of small, one to two ounce, pink, slightly oval-shaped, cherry sized tomatoes that are very tasty.	65
beefsteak	Indeterminate	Better Boy	The Better Boy variety of tomato has been in existence for more than 50 years! The fruit is red, juicy, yet meaty, and averages about a pound apiece. The plants themselves are resistant to Verticillium wilt, Fusarium wilt, Nematodes and Gray leaf spot.	70
paste	Indeterminate	Big Mama - large paste Roma	80 days Large, plum-shaped and meaty. Easy to peel and core. Used for soups, sauces and canning. Needs at least 1 inch of water per week. Paste	80
cherry	Indeterminate	Black Cherry	Black Cherry Tomato has all the sweet flavor of the larger black tomatoes, packed into a snack-sized treat. Can get up to 8' in height and plants produce 1" fruits in deep mahogany brown steadily and consistently throughout the summe	75
beefsteak	Indeterminate	Black Krim	Beefsteak fruits are a unique combination of violet-brown and purple-red—they turn almost black with sufficient sunlight and heat. Excellent full flavor.	70-90
slicer	Indeterminate	Brandywine, Red	A potato leaf plant that produces a large sized fruit with a sweet, rich, "spicy" flavor. The beefsteak shapes is pink to deep red, perfect sandwich tomato.	85

Cherry. Round or grape-shaped small tomatoes typically 1/2 to 2 ounces

Slicer. Round or oblate shaped tomatoes with slicing texture, typically 3 to 8 ounces.

Beefsteak. Oblate shaped slicing tomatoes typically 8 oz and larger

Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Determinate forms stop shoot production once flowers form on the ends.
Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.

Dwarf: A dwarf tomato plant is a tomato plant with dwarfism. It can be either determinate or indeterminate, but most are indeterminate, which is why they are so prolific for their size. Typical size is 1.5' to 4.5', and require staking. Can be grown in 5 gallon containers and should not be sucker pruned.

Limited quantities of all plants, so inclusion on this list is no guarantee of availability

Tomato – page 2

Cherry. Round or grape-shaped small tomatoes typically 1/2 to 2 ounces

Slicer. Round or oblate shaped tomatoes with slicing texture, typically 3 to 8 ounces.

Beefsteak. Oblate shaped slicing tomatoes typically 8 oz and larger

Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Category	Form	Variety	Description	Days to Maturity
slicer	Determinate	Bush Early Girl	4" across tasty red fruits are larger than Early Girl and ripen just 2 days later. 18" plants. Multiple disease resistances. Perfect for containers. Bush Early Girl bears a surprising number of delicious tomatoes in a small garden or a pot.	60
beefsteak	Indeterminate	Chef Choice Orange	5 to 6 inch beefsteak-type fruits have flattened globe shape, averaging 9 to 12 ounces each, with bright orange, almost neon color both inside and out that doesn't fade or discolor when cooked.	75
cherry	Indeterminate	Chocolate Cherry	Round fruits are borne on trusses of 6-8 and measure 1" in diameter; fruits hold well on the stem and resist cracking but can be picked several days before reaching maturity without sacrificing quality. Dark purple in color, sweet and delicious in taste	75
cherry	Indeterminate	Chocolate pear tomatoes	Nearly black pear-shaped tomatoes producing over a very long season. Chocolate Pear has the rich tomato flavor that has made heirlooms so popular! Light red in color, overlaid with swirls of varying hues of green or brown.	70
slicer	Indeterminate	Costuluto Fiorentino	This tomato's ribbed/scalloped appearance and rich flavor make it a favorite among gardeners and chefs alike, especially those looking for authentic Italian heirloom varieties. This variety is known for its excellent, robust, old-fashioned tomato flavor. It has a good balance between sweetness and acidity, making it ideal for sauces, salads, and other culinary uses.	80
beefsteak	Indeterminate	Dester	A large pink beefsteak variety that reaches 1 to 1-1/2 pounds. Its rich sweet flavor makes it an excellent slicer. Also used as a saucing tomato.	75

Determinate forms stop shoot production once flowers form on the ends.
Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.

Dwarf: A dwarf tomato plant is a tomato plant with dwarfism. It can be either determinate or indeterminate, but most are indeterminate, which is why they are so prolific for their size. Typical size is 1.5' to 4.5', and require staking. Can be grown in 5 gallon containers and should not be sucker pruned.

Slicer. Round or oblate shaped tomatoes with slicing texture, typically 3 to 8 ounces.

Beefsteak. Oblate shaped slicing tomatoes typically 8 oz and larger

Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Category	Form	Variety	Description	Days to Maturity
cherry	Dwarf	Eagle Smiley, Dwarf	Extremely productive, Spokane MG taste testing winner! Rugose, regular leaf plants grow to 5 foot. Bright to golden-yellow, 1 oz, globe-shaped fruit in clusters of 8 to 10 tomatoes	60
slicer	Indeterminate	Early Girl	57 days One of first to ripen and Spokane favorite. Keeps producing until frost. Full robust flavor. 1-1.5 inch tomatoes.	57
cherry	Indeterminate	Exserted Tiger	Blue tinted striped cherry.	70-90
slicer	Indeterminate	Fourth of July	One of the earliest varieties of non-cherry tomatoes. Red in color, globe-shaped, weight between 2 and 3 ounces. Described as possessing a better than average taste. Main attractions are its earliness, disease resistance and the volume of fruit.	55
cherry/large	Dwarf	Franklin County, Dwarf	Rugose, potato leaf plants produce small, 2 to 4 ounce, oblate-shaped red fruit. Looks like a miniature beefsteak-type, or large cherry-type tomato	75
Tomatillo		Gigantic Verde	Popular for salsa. Gigante has great flavor, with close to 50% more sugar than other tomatillos. It is also earlier, bigger and tastier than any other.	100
paste	Indeterminate	Gladiator	The dense flesh and tangy taste make the 8 oz. 'Gladiator' victorious for imparting rich, robust flavor to paste, sauces, soups, salsa, or ketchup.	72
cherry	Dwarf	Golden Cherry	Sweet tasting yellow cherry tomato. 6-12 inches tall.	75-80
slicer	Dwarf	Golden Heart, Dwarf	Rugose, regular-leaf plants produce heavy yield of medium sized, 4 to 10 ounce, yellow fruit, heart shaped tomatoes with a balanced, sweet flavor.	70

Determinate forms stop shoot production once flowers form on the ends.

Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.

Dwarf: A dwarf tomato plant is a tomato plant with dwarfism. It can be either determinate or indeterminate, but most are indeterminate, which is why they are so prolific for their size. Cherry. Round or grape-shaped small tomatoes typically 1/2 to 2 ounces

Slicer. Round or oblate shaped tomatoes with slicing texture, typically 3 to 8 ounces.

Beefsteak. Oblate shaped slicing tomatoes typically 8 oz and larger

Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Category	Form	Variety	Description	Days to Maturity
slicer	Indeterminate	Green Zebra	Fully ripened fruits are bright green, with stripes of a still lighter green. Round, smallish, 2 to 4 oz. fruits have excellent, "real tomato" flavor. Plants are vigorous. Slicer	80
paste	Determinate	Heinz	Heinz Tomato is a determinate mid to late season tomato variety with good and plentiful yields of medium to small tomatoes. As it's name implies good for sauces especially ketchup. Truly a good garden variety.	80
slicer	Indeterminate	Hungarian Heart	Heavy production of reddish-pink heart-type shaped fruit, up to 1 pound. Solid flesh with little to no core, few seeds and rich tasting.	80
cherry	Indeterminate	Iris Candy	The fruits are visually striking, featuring a yellow and red marbling with a "cat's eye" or starburst pattern on the blossom end	65
Paste	Indeterminate	Jersey Devel	A unique heirloom variety known for its elongated, pepper-like shape and vibrant red color. Exceptionally productive plants yield solid, very meaty, sweet fruits that are unsurpassed in sauces and salsas.	85
cherry	Indeterminate	Juliet	Large one ounce red grape style saladette. ASA awards for vigor, production and flavor. Sturdy stems, giant clusters. Crack resistant. Stake or cage. Awesome fresh, or try roasting and freezing.	60
Slicer	Determinate	Legend Tomato	Legend produces amazingly sweet tomatoes with just the right amount of acidity. The big, 4–5 inch, parthenocarpic fruit are glossy red, with a uniform round shape. Highly resistant to late blight.	68
cherry	Determinate	Mighty Sweet Hybrid	2 oz grape shape red snack-ready fruit. A tomato with robust flavour, crisp fleshy walls and no cracks after a rain.	65

Determinate forms stop shoot production once flowers form on the ends.
Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.

Dwarf: A dwarf tomato plant is a tomato plant with dwarfism. It can be either determinate or indeterminate, but most are indeterminate, which is why they are so prolific for their size. Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Category	Form	Variety	Description	Days to Maturity
cherry/slicer	Dwarf	Moliagul Moon, Dwarf	Rugose, regular-leaf plants that produce ivory to pale yellow colored, 2 to 6 ounce tomatoes with a well balanced, slightly sweet and tangy flavor. The shapes range from large cherry-type globes to medium-size slicers.	75
slicer	Dwarf	Mystic Lady, Dwarf	Rugose, potato leaf plants produce lots of medium sized, 4 to 6 ounce, pink colored, round shaped tomatoes with a well-balanced, pleasant flavor.	75
cherry/small	Determinate	Orange Hat, Micro Dwarf	Dense bushy with dark green foliage that grows to 9 inches tall. Prolific yield of bright to deep orange color fruit, yellow to deep red flesh with a juicy, sweet flavor. Easily grown in pots on patios, as a house plant or indoor hydroponics systems.	60
cherry/small	Determinate	Orange Hat, Micro Dwarf	Dense bushy with dark green foliage that grows to 9 inches tall. Prolific yield of bright to deep orange color fruit, yellow to deep red flesh with a juicy, sweet flavor. Easily grown in pots on patios, as a house plant or indoor hydroponics systems.	60
cherry	Indeterminate	Orange Paruche	Irresistibly sweet, brilliant orange, 1 inch round fruit, giant clusters, Vigorous and quick growing, Orange Paruche is resistant to fusarium and tobacco mosaic virus, grows well in containers	67
slicer	Indeterminate	Oregon Spring	60 days Early, 3-5 oz. red fruit. Cold tolerant. Nearly seedless. Good for ketchup and sauces. Heirloom slicer	60
slicer	Indeterminate	Paul Robeson	An old fashioned Russian heirloom that has a very tasty flesh that is juicy with a great acid and sweet balance. This deep maroon colored variety is slightly flattened and round and grows up to 4." The Paul Robeson Tomato is an excellent choice for cooler growing regions.	90

Determinate forms stop shoot production once flowers form on the ends.
Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.

Paste. Often called plum or Roma-type tomatoes, are typically medium-sized and oblong or cylindrical, with a higher solid content and fewer seeds than other tomato varieties, making them ideal for processing into paste and sauces.

Category	Form	Variety	Description	Days to Maturity
cherry	Indeterminate	Peacevine Cherry	A de-hybridized selection of Sweet 100, known for its incredible flavor and resistance to cracking. Produces impressive numbers of uniform bright crimson 1/2 to 1oz tomatoes in clusters of 8-10. One of the highest in vitamin C.	65
slicer	Indeterminate	Pink Berkley TieDye	8-12 oz. fruits are dark pink with green striping, and the flesh is pink with yellow streaks. The flavor is outstanding - sweet and complex like the finest heirlooms. Compact Indeterminate	70
slicer	Indeterminate	Pink Brandywine	Pink Brandywine tomatoes are known for their delicious sweet flavor, smooth flesh and hefty size of around 1 lb. each. Interestingly, these large, well-known heirloom tomatoes that date back to the late 1800s grow on vines that are potato-leafed.	90
beefsteak	Indeterminate	Pomodoro Red Pear	An old Northern Italy variety. It produces 8-18 oz Beefsteak type tomatoes. This variety is pear shaped, red skin, deep red flesh with heavy ribbing. It's a very heavy producer of excellent tasting dense tomatoes.	70
paste	Indeterminate	Pomodoro San Marzano Redorta	A larger tomato (8 oz., 4-inch) with much better taste than its cousin, San Marzano. Meaty, delicious enough to eat off the vine with the bonus of ending up with more tomato paste per plant. An excellent choice for a wonderful complex and flavorful choice for tomato sauce, canning or salsa.	85
Tomatillo		Purple	Known for their sweet, tart, and complex flavor, surpassing the green tomatillos in both flavor and sweetness. They are a deep purple color when ripe and can be used in various dishes, including salsa, salads, and even pie.	70

Determinate forms stop shoot production once flowers form on the ends.

Category	Form	Variety	Description	Days to Maturity
slicer	Indeterminate	Red Brandywine	The very vigorous plants bear large-lobed, beefsteak-shaped fruit that are perfect for slicing. The thin-skinned, pinkish-red tomatoes are flavorful but not acidic.	80
cherry	Indeterminate	Red Torch	This eye-popping tomato has superb flavor to match its stunning appearance. The 2 inch long, fiery red fruit are streaked with yellow and pointed like a flame. Prolific producer.	60
paste	Determinate	Roma	Traditional plum, large yields of pear-shape red fruit. 2 oz, 3" long. Meaty with few seeds and a bit of juice. Good for sauce or fresh. Stake or cage because heavy producer. Good disease resistance.	85-90
cherry	Determinate	Rosita's Brandywine Cherry	Large round pink cherry tomato packed with the flavor of the eponymous sweet slicing tomato, but with none of the production problems of the famous heirloom. Spokane MG taste test winner!	60
paste	Determinate	San Marzano	Reliable paste tomato with excellent taste.	80
paste	Determinate	Saucy Lady - paste tomato	Vigorously produces high yields of medium-sized, 3 to 4-oz., extremely firm, crimson red, oblong fruits that perfectly cook down into some of the smoothest sauces and pastes you have ever tasted. Its sweet flavor profile makes it wonderful for uses in pastas, homemade pizzas, and more!	80
slicer	Semi-determinate	Siletz	Developed at OSU, these plants produce substantial fruit even in cool weather. The fruit itself, is deep red, full flavored and excellent for slicing. Its taste and the fact that it produces very early in the gardening season is loved by many.	55
paste	Dwarf	Sneaky Sauce, Dwarf	Regular leaf dwarf plants produce excellent yields of 4 to 6 ounce, red, meaty, slightly heart-shaped tomatoes with a fine, well balanced, pleasant flavor.	75

Category	Form	Variety	Description	Days to Maturity
slicer	Indeterminate	Stupice	Czech bred, small to medium size red fruit. Early with high yields and mild taste. Resistant to cracking and blossom end rot.	60
cherry	Indeterminate	Sungold	The fruits are known for their explosively sweet flavor, and one of the first to ripen in the garden. Bright orange spheres measure 1 1/4 inch across and grow in clusters of 10-15 fruits. Staking or tall cages needed.	57
beefsteak	Indeterminate	Super Fantastic	Hybrid, solid meaty beefsteak, bright red color with smooth skin, 10 oz fruits, grilling, slicing, salads, salsa, canning.	70
cherry	Indeterminate	Supersweet 100	Hybrid plants produce long strands of 100 or more super-sweet cherry tomatoes, weighing about 1 oz. each and measuring 1" in diameter. Extra-high in Vitamin C. Plants bear fruits throughout the season. Requires staking or caging.	65
paste	Determinate	Supremo	Blocky deep red fruit. Use it not only for sauces and canning, but as a go-to salad slicer. Supremo is very heavy bearing, and the fruit ranges from large to extra-large size. It holds well on the plant and after harvest.	68
cherry	Indeterminate	Sweet Million	Enjoy sweet, cherry-sized tomatoes all season long with this highly productive variety. The sugary sweet, round, 1/2 - 1 in. fruits set in grapelike clusters—and the vines produce tomatoes all season long.	70
cherry/small	Determinate	Tiny Tim	Prolific producer with small 1/4 inch red fruit, fine flavor. Easily grown in pots or hanging baskets reaching 10-12 inches tall. Perfect for patios, small gardens and patios.	45
cherry	Determinate	Tumbler	For hanging baskets, containers, vines reach 12 to 18 inches in length and produce up to 6 pounds of deliciously sweet bright red bite-size fruit.	45

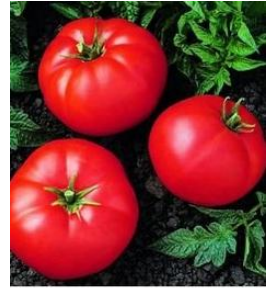

Determinate forms stop shoot production once flowers form on the ends.
Indeterminates form flowers along the sides of the shoots, but they continue to grow until weather conditions are no longer favorable.
